Subject Index to Volume 2

A

Actin, α-skeletal, acute right ventricular hypertrophy, L173
Adenosine monophosphate, cyclic
  calcium messenger system and, interactions, airway smooth muscle contraction, L279
  calcium release induced by, basolateral potassium channel activation, airway, L334, L343
  chloride secretion and, airway epithelium, L369
  diacylglycerol production and, airway epithelium, L294
  endothelium-dependent relaxation, hypoxia effects, pulmonary artery, L207
  epithelial chloride channels and, airway, L25
  surfactant secretion and
    lung, L241
    type II pneumocytes, L45
Airway
  contraction
    calcium and cAMP messenger systems in, L279
    hydrogen peroxide effects, L232
  epithelial cells, ion transport studies, L13
  epithelial chloride channels, calcium-dependent regulation, L25
  epithelial modulation of, L254
  epithelium
    basolateral potassium channels in, L334, L343
    chloride secretion, bradykinin-induced, L369
    diacylglycerol production, L294
  muscarinic receptor subtypes in, L349
  oxidant injury, hypochlorous acid and, L361
  ozone-induced inflammation, genetic models for, L313
  physiology, gastrin-releasing peptide effects, L68
  relaxation, benzyl alcohol and, L355
  responsiveness, biological variability in, L157
  small, postnatal development, alveoli, L321
  smooth muscle, coupling mechanisms in, L119
  substance P hyperresponsiveness, hypochlorous acid and, L361
  substance P-induced contractions, neurokinin receptors and, L99
Albumin
  chemically modified, interaction with pulmonary microvascular endothelium, L89
  methacholine-induced secretion, prostaglandins and, trachea (ferret), L75
  pulmonary arterial transendothelial flux, tumor necrosis factor-α effects, L57
Alveolar cells
  type II
    isolation and culture, L134
    prostaglandin and leukotriene production, L179
Alveolar epithelium
  monolayers, bioelectric properties, fetus, L201
  potential difference and fluid composition, amiloride effects, L215
Amiloride
  alveolar epithelial potential difference, fluid composition and, L215
  ion transport, alveolar epithelium, fetus, L201
Angiotensin-converting enzymes, kinetics, endothelial cell column, L188
Antigen challenge, cytoplasmic motility, alveolar macrophages, L220
Antioxidants, liposome-mediated augmentation of, pneumocytes, fetus, L165
Arginine, albumin interaction, lung endothelium, L89
Ascaris antigen, cytoplasmic motility, alveolar macrophages, L220
Asthma
  airway responsiveness, biological variability in, L157
  benzyl alcohol effects, airway smooth muscle, L355
  cytoplasmic motility, alveolar macrophages, L220
  substance P-induced hyperresponsiveness, hypochlorous acid and, L361

B

Benzamil, ion transport, alveolar epithelium, fetus, L201
Benzyl alcohol, relaxation induced by, airway smooth muscle, L355
Bradykinin
  chloride secretion and, airway epithelium, L369
  diacylglycerol production and, airway epithelium, L294
Bronchi, intrapulmonary, hydrogen peroxide effects on contraction, L232
Bronchoalveolar lavage, ozone-induced inflammation, genetic models for, L313
Bronchodilation, benzyl alcohol effects, airway smooth muscle, L355

C

Cachectin, pulmonary endothelial permeability and, albumin, L57
Calcitonin gene-related peptide, nasal mucosa, L81
Calcium
  cAMP messenger system and, interactions, airway smooth muscle contraction, L279
  intracellular, concentration, carotid chemoreceptor, L271
  regulation of epithelial chloride channels, airway, L25
Calcium ions, regulation of basolateral potassium channels, airway epithelia, L334
cAMP: *see* Adenosine monophosphate, cyclic
Catalase
  contractile response potentiated by, airways, L232
  liposome-mediated augmentation of, pneumocytes, fetus, L165
Cavalieri estimator, cell biology, L148
Cell biology, recent stereological methods for, L148
Central nervous system, tissue glutathione depletion, diethyl maleate effects, L308
cGMP: *see* Guanosine monophosphate, cyclic
Charybdotoxin, block of basolateral potassium channels, airway epithelia, L334, L343
Chloride
  secretion
    airway epithelial cells, L13
    basolateral potassium channels in airway epithelia and, L343
    bradykinin-induced, airway epithelium, L369
  transport, alveolar epithelium, fetus, L201
Chloride channels, airway epithelium, calcium-dependent regulation, L25
Coupling, electromechanical, airway smooth muscle, L119
Cycloid test systems, cell biology, L148
Cystic fibrosis, ion transport studies, airway epithelial cells, L13
Cytoskeletal system, cytoplasmic motility, antigen challenge effects, L220

D

Deoxyepinephrine, synthesis, lung, L227
Development, postnatal, lung alveoli, L321
Diacylglycerol, production, airway, L294
Diethyl maleate, depletion of tissue glutathione, hyperbaric oxygen toxicity and, L308
4-Diphenylacetoxy-*N*-methylpiperidine, muscarinic receptor subtypes, trachea, L349

E

Edema, pulmonary, alveolar epithelium, fetus, L201
Eicosanoids, alveolar type II cells, L179
Elastase, isolation, alveolar type II cells, L134
Electrolytes, secretion, submucosal gland, trachea, L112
Endocytic apparatus, movement of receptors and ligands through, alveolar macrophages, L263
Endopeptidase, neutral, hypoactivity, airway, L361
Endotoxemia, pulmonary intravascular macrophages, L1
Epidermal growth factor, movement of receptors and ligands, alveolar macrophages, L263
Epinephrine, synthesis, lung, L227
Epithelial cells, airway, ion transport studies, L13
Epithelium-derived relaxing factor, modulation, airway smooth muscle, L254

F

Fetus
  alveolar epithelium monolayers, bioelectric properties, L201
  pneumocytes, antioxidant defenses, liposome-mediated augmentation of, L165

G

Gallamine
  muscarinic receptor subtypes, trachea, L349
  tracheal smooth muscle tone and, L52
Gas, exchange, postnatal development of lung alveoli, L321
Gastrin-releasing peptide, glycoconjugate release and, trachea, L68
Gene, expression, hyperoxia-induced lung injury, neonate, L107
Genetics, molecular, lung physiology, L157
Glutathione, tissue, depletion with diethyl maleate, hyperbaric oxygen toxicity and, L308
Glycocalyx, albumin interaction, lung endothelium, L89
Glycoconjugates
  release, gastrin-releasing peptide effects, trachea, L68
  respiratory, nasal mucosa, L81
Guanosine monophosphate, cyclic, endothelium-dependent relaxation, hypoxia effects, pulmonary artery, L207

H

Heart ventricles, right, hypertrophy, α-skeletal actin mRNA effects, L173
Histamine, stimulation of surfactant secretion, type II pneumocytes, L195
Hydrogen peroxide, contractile response potentiated by, airways, L232
5-Hydroxytryptamine: *see* Serotonin
Hyperoxia
  lung injury induced by, gene expression changes and, neonate, L107
  tissue glutathione depletion, diethyl maleate effects, L308
Hyperresponsiveness, airway, biological variability in, L157
Hypertension, pulmonary, α-skeletal actin mRNA effects, L173
Hypochlorous acid, substance P hyperresponsiveness and, airway, L361
Hypoxia
  endothelium-dependent relaxation and, pulmonary artery, L207
  postnatal development, lung alveoli, L321

I

Indicator-dilution technique, angiotensin-converting enzyme kinetics, endothelial cell column, L188
Indomethacin, contractile response potentiated by, airways, L232
Inositol phosphates, diacylglycerol production and, airway epithelium, L294
Ions, transport, airway epithelial cells, L13
Isoproterenol
  airway smooth muscle contraction, L279
  diacylglycerol production and, airway epithelium, L294

K

Kininase II, kinetics, endothelial cell column, L188

L

Lactoferrin, nasal mucosa, L81
Lamellar bodies, isolation, alveolar type II cells, L134
Leukocytes, polymorphonuclear, ozone-induced inflammation, genetic model, L313
Leukotrienes, production, alveolar type II cells, L179
Liposomes, augmentation of antioxidant defenses and, pneumocytes, fetal, L165
Lung
  acute injury, pulmonary intravascular macrophages, L1
  alveoli, postnatal development, L321
  arterial transendothelial albumin flux, tumor necrosis factor-α augmentation of, L57
  epinephrine synthesis, L227
  function, alveolar type II cells, L134
  hyperoxia-induced injury, gene expression changes, neonate, L107
  microvascular endothelium, albumin interaction, L89
  physiology, genetic approach to study of, L157
  serotonin extraction, protein kinase C effects, L289
  surfactant secretion, regulation of, L241
  type II pneumocytes, surfactant secretion, L45
Lysine, residue modification, lung endothelium, L89
Lysozyme, methacholine-induced secretion, prostaglandins and, trachea (ferret), L75

M

Macrophages
  alveolar
    antigen challenge, L220
    endocytic apparatus, receptor and ligand movement, L263
    liberation of neutrophil enzyme-releasing peptide from, L328
    prostaglandin and leukotriene production, L179
  pulmonary intravascular, biology and pathogenic role of, L1
Metalloproteinases, tissue inhibitor of, gene expression changes, neonate, L107
Methacholine, secretion induced by, prostaglandins and, trachea (ferret), L75
Microelectrodes
  ion-selective, amiloride effects, alveolar epithelium, L215
  ion-sensitive, airway epithelial cells, L13
Mitochondria, intracellular calcium concentration, carotid chemoreceptor, L271
Models, genetic, ozone-induced inflammation, L313
Motility, cytoplasmic, alveolar macrophages, antigen challenge, L220
Muscarinic antagonists, tracheal smooth muscle tone and, L52
Muscarinic receptors: *see* Receptors
Muscle, smooth
  airway
    calcium and cAMP messenger systems in, L279
    coupling mechanisms, L119
    epithelial modulation of, L254
    relaxation, benzyl alcohol and, L355
  tracheal, tone, epithelial effects on, L52
Myosin light chain, airway smooth muscle contraction, L279

N

Nasal mucosa, calcitonin gene-related peptide in, L81
Neonate, hyperoxia-induced lung injury, gene expression changes and, L107
Neurokinin, receptors: *see* Receptors
Neuropeptides, substance P-induced contraction and, airway, L99
Neutrophils, enzyme-releasing peptides, liberation, alveolar macrophages, L328

O

Oxygen
  toxicity
    gene expression changes, lung, neonate, L107
    hyperbaric, diethyl maleate effects, L308
    liposome-mediated augmentation of, fetus, L165
Oxygen radicals, contractile response potentiated by, airways, L232
Ozone, inflammation induced by, genetic model for, L313

P

Parasympathetic nerves, contractile response, airway, hydrogen peroxide effects, L232
Peptides
  inflammatory, chloride secretion and, airway epithelium, L369
  neutrophil enzyme-releasing, liberation, alveolar macrophages, L328
Permeability, ozone-induced inflammation, genetic models for, L313
Phagocytes, mononuclear system, pulmonary intravascular macrophages, L1
Phenylethanolamine *N*-methyltransferase, synthesis, lung, L227
Phloridzin, ion transport, alveolar epithelium, fetus, L201
Phorbol esters
  alveolar type II cells, L179
  diacylglycerol production and, airway epithelium, L294
Phorbol myristate acetate, activation, extraction of serotonin and, lung, L289
Phosphatidylcholine
  benzyl alcohol effects, airway smooth muscle, L355
  secretion
    adenosine A_1 receptor-mediated inhibition, type II pneumocytes, L45
    regulation, lung, L241
Phospholipase C, alveolar type II cells, L179
Phospholipids, inositol, airway smooth muscle, L119

Pirenzepine
muscarinic receptor subtypes, trachea, L349
tracheal smooth muscle tone and, L52
Pneumocytes
antioxidant defenses in, liposome-mediated augmentation of, fetus, L165
type II
histamine stimulation of surfactant secretion, L195
surfactant secretion, L45
vasopressin signal transduction, L301
Potassium channels, basolateral, airway epithelia, L334, L343
Prostaglandins
antioxidant defenses and, pneumocytes, fetus, L165
chloride secretion and, airway epithelium, L369
methacholine-induced secretion and, trachea (ferret), L75
production, alveolar type II cells, L179
Protein kinase C
activation, extraction of serotonin and, lung, L289
diacylglycerol production and, airway epithelium, L294
Pulmonary artery, endothelium-dependent relaxation, hypoxia effects, L207
Pulmonary edema: *see* Edema
Pump, sodium-potassium, submucosal gland, trachea, L112

R

Receptor-ligand complex, movement, alveolar macrophages, L263
Receptors
chemoreceptor, carotid, cellular basis of transduction in, L271
muscarinic, subtypes, trachea, L349
neurokinin, substance P-induced contraction and, airway, L99
Respiratory activity, retrotrapezoid nucleus, L33
Respiratory distress syndrome
adult
liberation of enzyme-releasing peptide from macrophages, L328
tumor necrosis factor-α-induced endothelial permeability, L57
Respiratory regulation, neural, retrotrapezoid nucleus, L33
Rhythmogenesis, respiratory, retrotrapezoid nucleus, L33
Rostroventrolateral medulla, respiratory activity and, L33

S

Serotonin
contractile response potentiated by, airways, L232
extraction, protein kinase C effects, lung, L289
Sodium
efflux, submucosal gland, trachea, L112
pump: *see* Pump
Sodium-glucose cotransport, alveolar epithelium, fetus, L201
Staurosporine, protein kinase C effects on serotonin and, lung, L289
Submucosal glands
glycoconjugate release, gastrin-releasing peptide effects, L68
sodium efflux, L112
Substance P
contraction induced by, neurokinin receptors and, airway, L99
hyperresponsiveness, airway, hypochlorous acid and, L361
Superoxide dismutase
contractile response potentiated by, airways, L232
liposome-mediated augmentation of, pneumocytes, fetus, L165
Surfactants
hyperoxic lung injury, gene expression changes, neonate, L107
pulmonary, vasopressin signal transduction, pneumocytes, L301
research, L238
secretion
adenosine A_1 receptor-mediated inhibition, type II pneumocytes, L45
histamine stimulation of, type II pneumocytes, L195
regulation, lung, L241
trypsin, alveolar type II cells, L134

T

Trachea
glycoconjugate release, gastrin-releasing peptide effects, L68
methacholine-induced secretion, prostaglandins and (ferret), L75
muscarinic receptor subtypes in, L349
submucosal gland, sodium efflux, L112
Trachealis muscle, tone, epithelial effects on, L52
Trypsin, liberation, alveolar macrophages, L328
Tumor necrosis factor-α, albumin flux and, pulmonary arterial transendothelial, L57

V

Vasopressin, signal transduction, type II pneumocytes, L301
Volume, lung, postnatal development of alveoli, L321
